Chitkara University, Punjab

Overview of PEEPPOST: PEEPPOST is a dynamic social media platform designed specifically to cater to the unique needs of all the users. It serves as a digital hub where people can connect, communicate, and collaborate on various aspects of life.

Objective: The primary objective of PEEPPOST is to enhance communication and community among users. By providing a centralized platform for interaction, PEEPPOST aims to bridge the gap between people, streamline organizational processes, and foster a sense of belonging within the community.

Key Features: PEEPPOST offers a comprehensive set of features designed to facilitate seamless communication and knowledge sharing. These include user profiles for personalization, a dynamic news feed for updates and announcements, group and event management functionalities, direct messaging for private communication, resource sharing for academic materials, and a dedicated forum for campus tips and hacks. Together, these features create a vibrant and engaging platform that enriches the experience for users.

Manual Processes: Traditional activities such as club recruitment and event organization rely on physical methods, resulting in time-consuming and inefficient processes.

Limited Mentorship: Youngsters lack interaction with seniors, missing out on valuable guidance and insights crucial for navigating life effectively.

Fragmented Communication: Important updates and announcements are scattered across different mediums, making it challenging for people to stay informed about events and activities.

Digital Solution Needed: To address these challenges, there's a clear need for a centralized digital platform like PEEPPOST, which can streamline processes and enhance communication among people.

Problem Statement

- **Inefficiency in Communication**: Manual processes like club recruitment and event advertising lead to inefficiencies, requiring physical presence and extensive time investment.
- **Limited Interaction**: The fragmented nature of communication channels hinders interaction between youngsters and seniors, depriving youngsters of valuable mentorship and guidance.
- **Fragmented Knowledge Sharing**: Practical information like room availability and study tips is informally shared, often inaccessible to all people, hampering effective knowledge dissemination.
- **Digital Solution Needed**: PEEPPOST addresses these issues by providing a centralized digital platform, streamlining processes, and fostering communication and knowledge sharing among people.

**SO, WHAT'S
THE
SOLUTION?**

Solution - PEEPPOST

Digital Platform: PEEPPOST provides a digital platform specifically tailored for people, enabling seamless communication and interaction.

Streamlined Processes: Centralized hub for club recruitment, event advertising, and fest organization simplifies processes, saving time and effort for people and organizers.

Enhanced Communication: Features like user profiles, news feed, and direct messaging facilitate communication, fostering a more connected community.

Knowledge Sharing: Dedicated sections for resource sharing and campus tips promote the exchange of practical information and insights among people.

- Backend: Node.js, Express.js
- Frontend: React.js, HTML, CSS, JavaScript
- Database: MongoDB
- Tools: Postman, VS Code, NPM

- **User Profiles**: Personalized user profiles
- **Tweet Feed**: Dynamic updates and announcements
- **Direct Messaging**: Private communication
- **Resource Sharing**: Day to Day Media
- **Community Tips**: Forum for practical information

Future Scope.

- Integration with administrative systems
- AI-driven recommendations for personalized experiences
- Enhanced security features
- Continuous evolution based on user feedback and technological advancements

Work done till now...

A screenshot of a web browser displaying a login form. The browser's address bar shows the URL '127.0.0.1:3000/auth'. The page has a dark background. At the top center is a circular logo with the text 'PEEP POST'. Below the logo, the word 'Login' is centered in a large, white, sans-serif font. The login form is a dark gray rectangle in the center. It contains two input fields: 'Username *' and 'Password *'. The 'Password *' field has a toggle icon (an eye) on its right side. Below the input fields is a dark gray button with the text 'Login' in white. At the bottom of the form, there is a link that says 'Don't have an account? [Sign up](#)'. The browser's taskbar is visible at the bottom, showing various application icons and the system clock indicating 12:18 PM on 06-09-2024.

Login Form: The screenshot displays a user registration form. Users can input their details, including username, and password. The form likely includes validation checks to ensure data accuracy.
